

# Can your surface disinfectant be used on all this?

## Ours can.

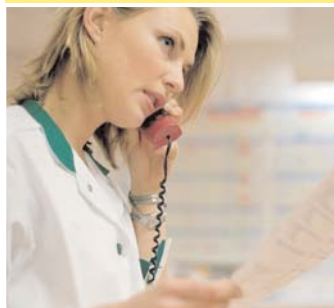

**The CaviCide family.  
Kills TB in 5 minutes.  
Kills HBV in 3 minutes.  
Protects things delicate.**

With healthcare-related infections one of the leading causes of death, patient safety weighs heavily on your mind. **CaviCide®** and **CaviWipes™** can alleviate your important surface disinfection concerns. They're so nontoxic\* they can be used on surfaces near the most compromised of patients – such as in the neonatal unit – and on the most sensitive of high-end equipment – all without damage to surfaces. So choose the **CaviCide** family. Patient safety is in your hands.

For the power of **CaviCide** in the convenience of a wipe, try **CaviWipes** disinfecting towelettes. For more information contact us at 800.841.1428 or visit us online at [www.metrex.com](http://www.metrex.com).

\*Studies have shown that CaviCide liquid is nontoxic to humans in normal use; however, all label precautions must be followed.
