

**Heart Health,  
Eye Health &  
Skin Health will be  
Changed Forever!**

**NEW Cell Care with  
biocellular micellization™**

biocellular micellization™

# The Super Antioxidant Solution!

**NEW CELL CARE** is the **ONLY** Liquid Super Antioxidant with biocellular micellization™ for enhanced absorption. **CELL CARE** combines the powerful protection of Over 20 antioxidant sources, including Coenzyme Q10, Vitamin E, and Resveratrol, all in one great tasting fruit-flavored drink!

BIOMETICS

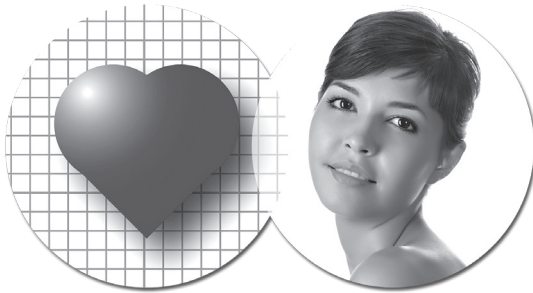

**ADVANCED LIQUID NUTRITION**

# CELL CARE Super Antioxidant Heart Health Formula

Are you looking for the latest in cutting edge supplementation for heart health, cell-care and anti-aging nutrition?

The advanced **CELL CARE** formula combines the powerful protection of over 20 antioxidant sources including Vitamin E, Coenzyme Q10 and Resveratrol in one great tasting fruit-flavored drink!

**CELL CARE** is the ultimate liquid supplement for heart health and complete antioxidant protection.

CELL CARE for healthy heart, eyes & skin

The unique Super Antioxidant formula in **CELL CARE** delivers a natural antioxidant blend, essential fatty acids and botanical extract blend to help neutralize the damaging effects of free radicals and promote better health on a cellular level.\*

- Keep your heart healthy and protected\*
- Refresh your entire body on a cellular level\*
- Fight the effects of aging and free radical devastation\*

## DID YOU KNOW?

A majority of powerful antioxidants are in an oil-based form. This makes it difficult for the body to absorb and utilize them efficiently. The **biocellular micellization™** proprietary process provides the body with antioxidants that are in a water-soluble form for faster and more efficient absorption.

### What is **biocellular micellization™**?

Micellization is the scientifically accepted term for the body's natural process of converting fat-soluble nutrients into the water-soluble form called micelles. In order to do this, the body must continually work to convert the food you ingest until it is in the proper form to be utilized by your cells.

biocellular micellization™

**Biocellular micellization™** simply mimics the body's final stage of creating micelles to be effectively absorbed by the cell walls. By surrounding the fat-soluble nutrients with water molecules and rendering them smaller in size, the human body's water-based system can assimilate the nutrients more efficiently and begin utilizing them. This process is owned solely by **Biometrics** and that means our products are the only source of this new technology.\*

## Over 20 Sources of Antioxidants!

Supplement Facts	
Serving Size 1 tbsp (15 mL)	
Servings Per Container 30	
Amount Per Serving	% Daily Value*
Calories 20	
Calories from Fat 5
