

Universal Locking Cables

Updated June 2012

SKU 34-8801 Small
SKU 34-8802 Canoe
SKU 34-8803 Large

These locking cables can be used to secure your boat to the Suspenz Storage Racks, Car Racks, Trees, Posts and more. Note that this system is meant to hinder theft, it will not secure kayaks or canoes to roofs or roof racks for transport purposes.

Caution: Before using these locking cables on a Roof Rack, secure the boat to your roof rack according to the manufacturer's directions. Serious injury or damage may result if used for any

Item #	Parts List	Qty
1	Cable A (Long cable)	1
2	Loop B (Short cable)	1

Locking Instructions:

1. Slide the large loop on **Cable A** (the long cable) over the front end of the boat and continue to slide toward the center of the boat until fairly snug.
2. Slide the loop on **Cable B** (small loop cable) over the stern of your boat, with the lock eye hanging down.
3. Wrap the **Cable A** under and over the bars (*or around the Storage Rack, Post or Tree, i.e. any object that is stationary*) and up to the **Lock Eye on Cable B**.
Note: depending on the length of your boat, you may need to wrap the cable several times to remove the slack.
4. The Lock Eyes on both cables should now be close enough to slide the hasp of YOUR padlock through the Lock Eyes. When properly installed, the padlock will hang in the air, away from your boat or vehicle.

*TIP: The goal is to wrap the Long Cable around your stationary object until the **slack is gone!***

With a little practice, you'll be able to install and uninstall the Universal Locking Cable in seconds!

Guarantee

All Suspenz products are guaranteed for one year for materials and workmanship. The guarantee is affective to the original owner and if the product was cared for and used in the manner it was intended. Contact Suspenz directly with any questions.
