LEAGUE ORGANIZER™
Sports Software

Used by thousands of leagues, League Organizer™ Sports Software helps leagues take control of their rosters, schedules, equipment, uniforms, and finances. The programs are easy to use, requiring no previous computer experience.

Little League® Edition

The Little League® Edition is licensed by Little League Baseball for use by it's leagues. It creates the registration file required by Little League, prints rosters, and creates game schedules satisfying Little League requirements. If your league is currently using Little League's software, League Organizer™ will save you time by importing the information you have already entered. Adding the Online Registration Module lets you import registrations directly from the Little League Network.

Baseball/Softball Edition

The Baseball/Softball Edition can be used by both youth and adult leagues. It is being used successfully by leagues affiliated with the ASA, Babe Ruth Baseball, Pony Baseball, Dixie Baseball, Dizzy Dean, American Legion, and others.

Football, Basketball, Hockey Editions

The Football Edition and the Basketball Edition also include cheerleading. The Hockey Edition can be used for ice hockey or roller hockey.

Soccer System

The League Organizer™ Soccer System is composed of League Organizer™, League Organizer™ Lite, and League Organizer™ for State Soccer Associations. It provides integrated software for clubs, leagues, and state associations. It is used extensively by leagues associated with US Youth Soccer and USASA and it is the official software of US Futsal.

Sports Edition

The Sports Edition, supporting ten different sports, is preferred by recreation departments and other organizations which sponsor multiple sports.

If you already have player information entered into another computer program, we can probably transfer your data into League Organizer™. Please contact Logical Solutions, Inc. for more information about this service.

To place an order, print and mail the enclosed form with a check or money order, visit our website at www.LeagueOrganizer.com, or call Logical Solutions, Inc. at (800) 659-4111 or (215) 635-4111.

What is **LEAGUE ORGANIZER**™?

League Organizer™ is custom registration and scheduling software which is sold nationally. That means you get the advantages of custom software designed for the way you run a league, and the benefits of a nationally sold program which include extremely low cost and ideas from lots of users. Someone from across the country can have a great idea, and you get to use it also!

Registration

Collect each player's name, address, phone number, birth date, sex, email address, team and tournament team assignments, age group, playing level, preferred playing positions, jersey number, uniform size, parent names, addresses, phone numbers, email, and occupation, school grade, neighborhood, emergency contact, doctor, medical notes, insurance companies, and photo, dues and fund raisers. With the soccer edition you can also record penalty cards, transfers and releases, suspensions, certifications, subsidized players, disabled players, individual ratings, and international clearances.

Collect volunteer name, address, phone numbers, birth date, sex, registration number, household number, email address, team assignments, penalties, suspensions, certifications, coaching license, referee/umpire grade and rating, and photo.

Ease of Use

If you do not want to record all this information you can enter what is relevant to your league. The short player form lets you enter the most important information on a single page. The long forms are arranged on several pages, with the most important information (name, address, birth date) collected on the first page and team assignments on the second   To aid the fast typist, the page up and down keys are used to move between pages and the control key between names. In keeping with our philosophy that software should be a tool and not an enforcer, the computer will beep and flash a warning when a player is too old or young for a team. It also keeps a running count of the number of players assigned to each team and warns if there are too many.

Transfers and Suspensions

Soccer transfers are easily entered by changing a player's status on the player form. Released players can automatically be moved to the inactive file. These transfers and releases are later listed at the bottom of the state rosters. When a player or coach is suspended, s/he can be moved to the inactive file which is automatically checked each time a new player is imported into League Organizer™ for State Soccer Associations.

Risk Management

To aid in risk management, volunteer forms request social security number, drivers license and expiration date. There is a place to check that these have been verified and the date of verification. *League Organizer^TM* can create a file which can be used by a a background check company to easily check each volunteer.

Database Integrity

To protect the state's data, the registration file from the leagues will not be created if names are missing critical information such as last name, address, or birth date. League codes must be entered before it can be sent. A page is automatically printed with the disk listing the number of players, coaches, referees, other volunteers, and teams. If the file is sent through the internet, this information is put in an email note.

New Season

At the end of the season, all personnel are moved to the inactive file, then back again as they re-register. When moving names, there are options to change player school and grade, change default dues, change current registration date, and erase team assignments. All of these have been suggested by users. Pre-printed registration forms can ease the registration process. Each form prints the information in the computer, with lines to indicate missing information and an area for customization. The address is even positioned to be placed in a window envelope.

Other Nice Things

There are many, many more things *League Organizer^TM* can do. It can assign tryout numbers and print grids used at tryouts. If you enter each team's colors and the player sizes, it will print a count of uniform requirements by size and color. If you enter dues payments and check numbers, it will print deposit slips. If you enter penalty codes, it will print a letter (which you compose) to the players' parents, laid out for a window envelope. If you enter household codes (which is created automatically from the phone number) you can easily change the address of all members of the household. To speed up typing, you can enter default area code, town, and zip code for new personnel, as well as maintain a list of frequently used towns and zip codes, schools, and doctors.

Lists, Labels, Rosters, Reports

League Organizer^TM prints many lists, reports, rosters, and mailing labels. It counts the number of labels in each zip code to save in bulk mailings. You can even use the label routine to send a note via email. It prints many different lists of personnel, counts of players and teams, an email directory, lists of suspended players and coaches, risk management lists, a directory of league officers, and an age ratio analysis to be sure the teams have an even distribution of younger and older players.

Customization

How does *League Organizer^{TM}* satisfy each national or state affiliation? Select the name of your affiliation from a master list and new menu choices appear. Here are found any special forms or activities the affiliation has requested, such as player and coach passes, registration forms, special rosters, reconciliation forms, and registration exports to parent leagues and member clubs.

Referees/Umpires

League Organizer^{TM} also tracks referees/umpires, their certification grade, and rating. They can be assigned to games and their schedules printed in several formats, even a page for each official which includes the name and phone numbers of the partners. If you enter an officiating fee for each position in the game division form (which has a specific age group, difficulty level, and gender), *League Organizer^{TM}* can link the schedule with these fees and create an earnings report.

Assigning

The Assignor's Assistant^{TM} module enhances adds the ability to track referee certification dates, grades, and ratings for USSF, Futsal, high school, college, and private school. It also lets you record these for instructors, assessors, and assignors. This module lets you enter the days and dates referees are not available so that the assigning grid pops up only referees who are certified for that game and are available. The popup includes the referee grades and ratings to further ease the assigning process.

Schedules

The scheduler is fully integrated into *League Organizer^{TM}*. Enter the team names for registration and use the list for scheduling. Enter the coaches, then print a conflict report looking for coaches having two teams playing overlapping games. Enter the referee payment amounts into the division forms, and calculate referee earnings.

Schedules can be recreational or competitive. Each division (the group of teams which play each other) is scheduled separately yet saved in the same database, so all games are checked for field availability and adjusted accordingly. Of course, all schedules can be changed after they are generated. Many different types of schedules can be printed, in several formats, for a range of dates.

If you enter scores, you can print results and calculate standings. If you assign referees, you can print referee schedules. If you have a web site, you can generate web schedules, scores, and standings to be posted on the internet.

Uniforms and Equipment

League Organizer™ even tracks a league's uniforms and equipment. Enter the inventory, distribute items to teams or individuals, and print a list of outstanding equipment.

Finances

Leagues who need financial statements but do not want to use an accounting program can use *League Organizer™* instead. Enter each check, assign an account such as equipment or dues, and print an income statement.

Tournament Schedules

Many leagues hold tournaments at the end of the season. Some host tournaments during the season. The optional Tournament Module lets you seed the tournament using the standings from the round robin league play or, if you are hosting a tournament, from the names of the visiting teams. Each age group is scheduled separately. Enter the number of teams in the tournaments, the dates, the age group, and the number of fields. The Tournament Module will create the brackets and, if you assign dates and times for each tournament round, will also schedule the games. As you record the scores, the next round of games is automatically assigned. Click the print button and you will get updated schedules and brackets to give to the participants and post to your web site.

Internet

League Organizer™ is desktop software which links to the Internet. Rosters, schedules, scores, and standings can be printed in an html format ready for uploading to a web page. Email can be sent to groups using the label routine. Registration files can be sent through the Internet instead of copied to a diskette. It even prints an email directory. These Internet connections are all done automatically using the computer's default Internet options.

To ease entry into the internet, *League Organizer™* provides menu choices to open the default email program and web browser. It even comes with the state association's email and web addresses already entered to make the connection easy.

Online Registration

Online registration is simple, flexible, dependable, quick, and secure. Powered by Active Team Sports, the Online Registration Module simplies the entire registration process, avoiding long lines at registration, processing dues payments with ease, and updating *League Organizer™* files automatically. You select which information to collect on the internet and your league's players and volunteers can easily register from home.

Manager's Assistant® $89

The **LEAGUE ORGANIZER**™
Soccer System

The League Organizer™ Soccer System lets clubs, leagues, districts, and state associations track personnel and send the information to each other, via disk or internet. Not only does this save typing effort and costs, but it greatly reduces the time required to input thousand of names and addresses, allowing rosters, passes, and labels to be printed considerably sooner. Information includes the name, address, phone number, and birth date of players, coaches, managers, referees, administrators and other volunteers, as well as team assignment of players, coaches, and managers and license information of coaches and referees. Since many states have their own roster format, *League Organizer™* even prints different rosters and reports for each state.

League Organizer™ for State Associations reads names from districts, leagues, and clubs and prints mailing labels, rosters, player passes and many reports. It tracks ODP players as well as league fees. It creates ascii text files which can be sold to mailing houses and sent to US Youth Soccer and US Soccer. Since league requirements often vary, this program is modified as needs change.

League Organizer™ Soccer Edition is currently running thousands of organizations across America. It helps districts, leagues and clubs organize their players and volunteers, equipment distributions and returns, uniforms, and finances. Its schedule generator creates recreational and traveling schedules. Games scores can be entered and standings will be automatically calculated. *League Organizer™ Soccer Edition* prints over 200 reports, in many different formats. Among its many reports are rosters, mailing labels, equipment return lists, pre-registration forms, schedules, and a risk management report. At the end of the season, names are moved to an inactive file. As players and volunteers return, they are moved back to the active file with no need to re-type.

The *Online Registration Module* is simple, flexible, dependable, quick, and secure. The Online Registration Module lets players and volunteers register on the Internet and import the registration directly into *League Organizer™*. This simplifies the entire registraion process, avoiding long lines, processing dues payments with ease, and automatically updating *League Organizer™* files. You select which information to collect on the Internet and your league's players and volunteers can easily register from home.

The *Tournament Module* schedules end of the season tournaments and invitational tournaments held during the season. The optional Tournament

Module lets you seed the tournament using the standings from the round robin league play or, if you are hosting a tournament, from the names of the visiting teams. Each age group is scheduled separately. Enter the number of teams in the tournaments, the dates, the age group, and the number of fields. The Tournament Module will create the brackets and, if you assign dates and times for each tournament round, will also schedule the games. As you enter the scores the next round of games is automatically assigned. Click the print button and you will get updated schedules and brackets to give to the participants and post to your web site.
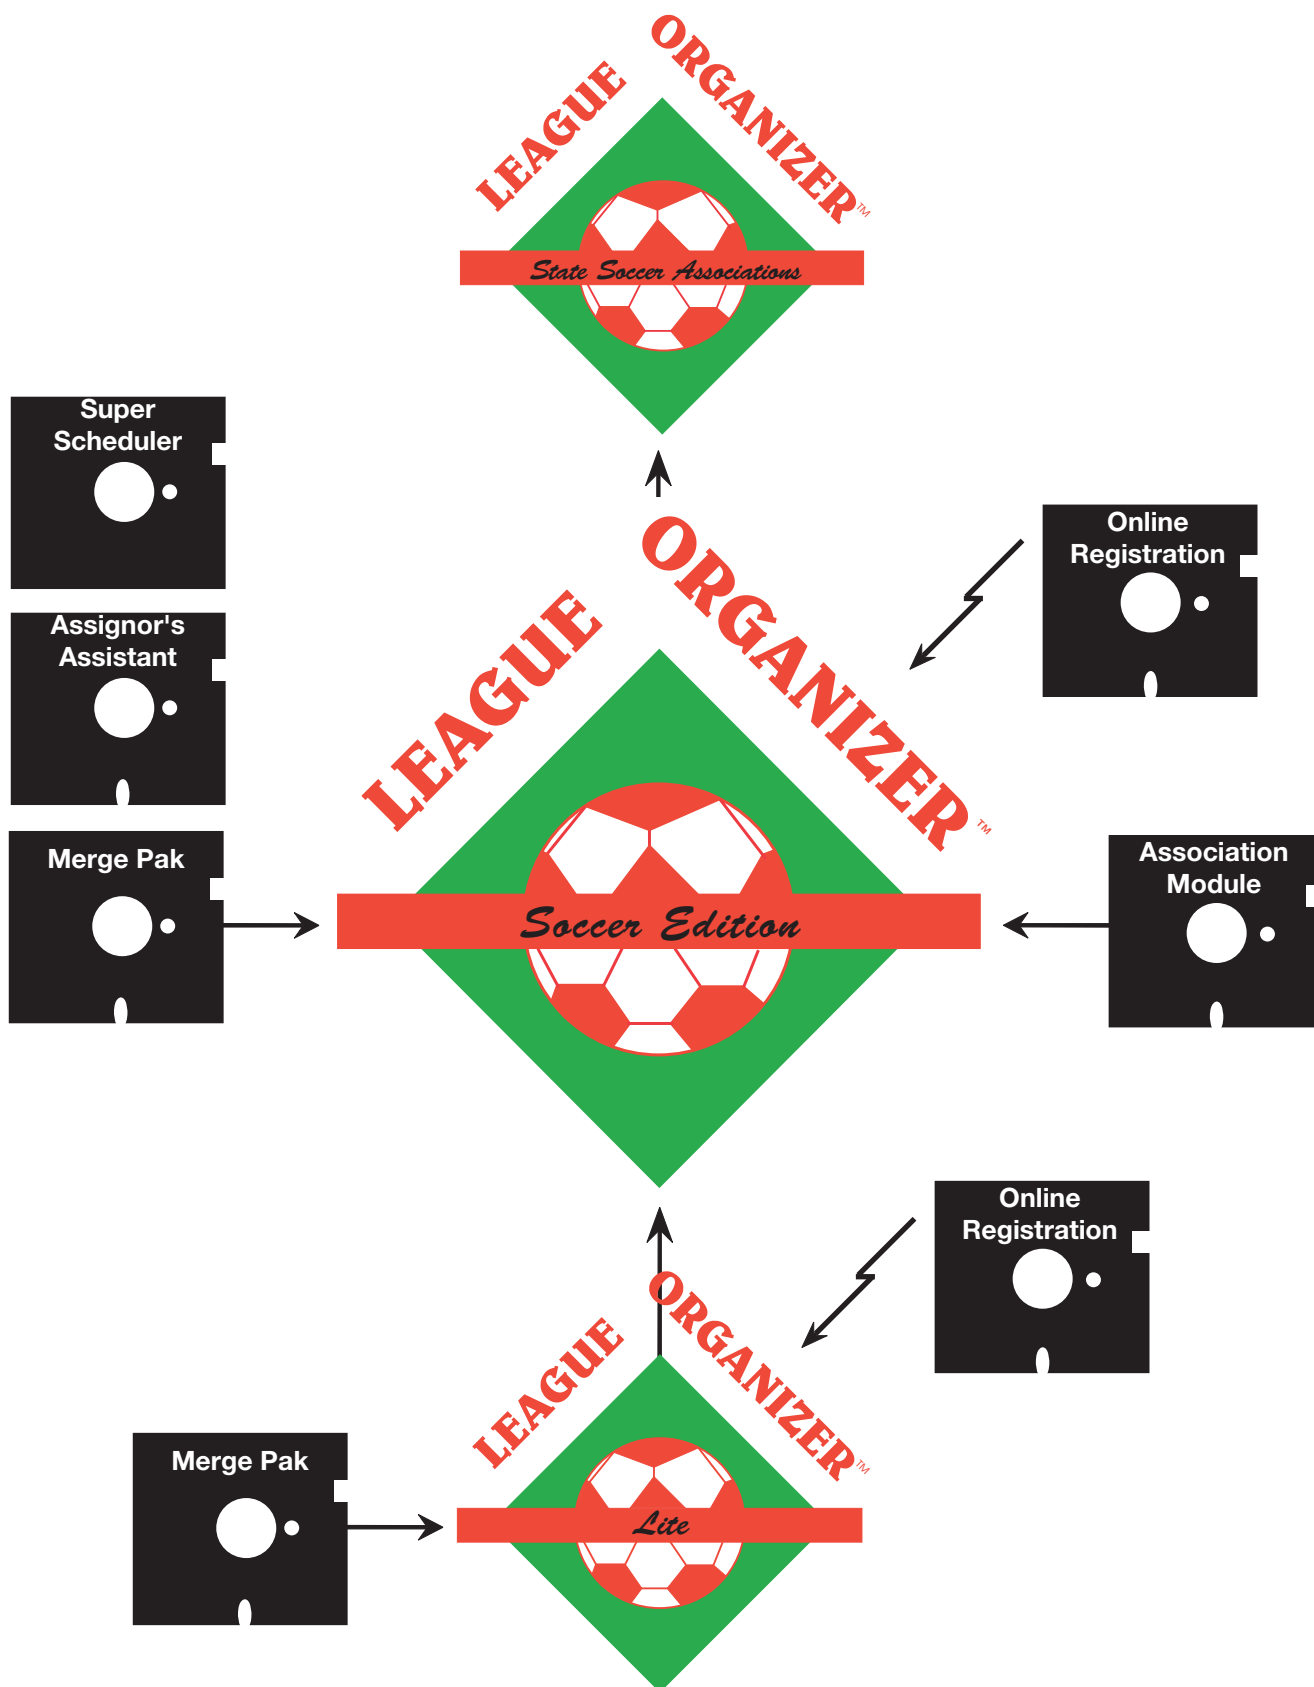

The *Super Scheduler Module* helps large leagues generate schedules for multiple clubs. It honors team requests to not play certain days and allows fields to be listed as unavailable. It also permits a wider choice of game times and alternate days to play if fields are not available. Of course it print numerous types of schedules, reports, and standings.

The *Assignor's Assistant Module* helps assign referees. Enter certification dates and grades and the dates each referee is unavailable, and the assigning grid will pop up only the available referees. Print assigning forms, schedules, and 1099's.

The *Association Module* allows leagues and districts to import names from their clubs (sent on a disk or through the internet), critical if a league has thousands of players. It also lets leagues print lists and mailing labels for club representatives, create a disk of names for each club, and identify the club affiliation of each person.

League Organizer™ Lite is the personnel section of *League Organizer™*. If the other sections are not needed, this the best way to get names to the parent leagues and districts and to the state office. Clubs have the option to upgrade to the full League Organizer™ in the future so that a state can purchase *Lite* for its clubs and the clubs can upgrade at their own expense. *League Organizer™ Lite* is an affordable alternative to *League Organizer™*. It tracks all personnel, print rosters, passes, and mailing labels, and creates a disk file which can be mailed to the state office, or sends the file through the internet.

Basketball

Super Scheduler™ *$299*

The scheduler
you've been hoping for:

✦ **Generates traveling schedules**
Assigns games to the home team's site.

✦ **Schedules shared sites**
Rotates teams among the sites you specify.

✦ **Checks site availability**
Schedules games only where sites are available.

✦ **Schedules games when you want them**
You decide the days and times each division will play.

✦ **Skips dates you don't want to play**
No games will be scheduled on the dates you want to skip.

✦ **Selects alternate days**
Schedules games on alternate days when an available site cannot be found.

✦ **Switches home and away**
Assigns games to the opposing team's site when an available site cannot be found, then switches the sites again the next time the two teams play.

✦ **Honors special requests**
Coaches can request that their team play or not play on specific days, dates, or times.

✦ **Permits manual changes**
Change all schedules easily.

✦ **Tracks game officials**
You can assign officials to games.

✦ **Calculates standings**
Calculates standings within each division for the entire season or a range of dates.

✦ **Prints schedules**
Prints schedules for the league, divisions, teams, sites, and game officials.

✦ **Prints worksheets**
Prints worksheets to enter scores and to assign officials.

✦ **Prints results**
Mail the scores for the week to local newspapers and print the standings for each division.

✦ **Reports conflicts**
Searches for coaches or officials who are assigned to overlapping games.

✦ **Lists unscheduled sites**
Lists all the times during the day when the site is not scheduled.

✦ **Prints mailing labels**
Prints labels for coaches, managers, game officials, and organizations.

✦ **Lists personnel and organizations**
Prints a list of all information about each coach, official, or organization, or a single line list for easy reference.

✦ **Calculates payments for game officials**
Calculates payments for each official according to the divisions and positions assigned.

✦ **Schedules tournaments**
Enter the number of teams, the number of fields, and the dates and times of each round to create a tournament schedule and brackets. Seed the schedule from league standings or enter the visiting teams. As you record the scores, the brackets automatically update. Click the print button and you have the latest brackets to distribute to participants and post on your web site.

✦ **Schedules 7 sports**
Schedules baseball, basketball, football, hockey, lacrosse, soccer, softball

✦ **Super Schedule your League Organizer™**
Add a Super Scheduler™ module to League Organizer™ to enhance its scheduling section.
