

SCARE PEST BIRDS AWAY "NATURALLY"

WITH THE **BIRD-X**

PROWLER OWL

SEARCH AND DESTROY

Its mission -- to rid your area of bothersome birds.

ON THE HUNT

Always-moving "hunting" posture, never perching, so birds can't get used to it.

LIFELIKE & EFFECTIVE

Most realistic predator on the market – life size, accurate markings. Huge, spanning nearly 4 feet, patented flapping wings lift and fall as the head and "airfoil" body move in the wind.

ULTIMATE AERIAL PREDATOR

Great Horned Owl: the most-feared predator of pigeons, starlings, geese, other birds, even skunk, rodents, rabbits and squirrels – it catches and eats almost anything that moves!

TIRELESS

Perfect patrol for gardens, parks, golf courses, marinas, rooftops, open areas. Set it up anywhere -- the breeze and its natural appearance take care of the rest!

Don't be fooled by imitations that just "sit" there – without movement they're useless!

Specifications

Wingspan 44", total head-to-tail 28", head diameter 7"
